ABSTRACT

This publication summarizes the responses of the State University of New York constituent institutions to the 1991 Attrition/Retention Survey (91-10) administered by the Central Office of Institutional Research. It includes racial/ethnic detail and partial history of later cohorts as of fall 1991 along with trends in attrition and retention of full-time, first-time students, in baccalaureate and associate degree programs, classes of fall 1977 through fall 1991. The report is organized into four parts. Part 1 provides attrition, retention, and graduation information for the following students enrolled in a SUNY Baccalaureate Degree Program: full-time, first-time students entering in fall 1985 through fall 1990; full-time, first-time students entering in fall 1985 by race and ethnicity; full-time, first-time opportunity students entering in fall 1985 by race/ethnicity; full-time, transfer students on entering in fall 1985 through fall 1990; and full-time, upper and lower division transfer entering in fall 1985 by race/ethnicity. Part 2 contains similar information for students enrolled in a SUNY Associate Degree Program. Part 3 includes baccalaureate trend data for the State University of New York institutions as of the fall 1991 semester for full-time, first-time students, classes of fall 1977 through fall 1990. Part 4 provides associate trend information for full-time, first-time students, classes of fall 1977 through fall 1991. All tables include headcount and percentage data from a SUNY system perspective, by institutional type and by campus. (GLR)

# INTRODUCTION

This publication summarizes the responses of the State University of New York constituent institutions to the 1991 Attrition/Retention Survey (91-10) administered by the Central Office of Institutional Research. There have not been any changes in the detail of the data reported since the last publication (Report Number 4-92). SUNY Central has the capacity to develop an institution's attrition and retention survey data from the Student Data File (SDF) and the Automated Degree File (ADF) tapes submitted by the campus. So if an institution has participated in the SDF and the ADF the requisite number of years, responses to the attrition and retention survey are generated centrally from data prepared and transmitted locally by the campus.

The significant factors in the development of a student's academic career and plans are varied and diverse; consequently, there are innumerable questions that may be asked regarding student retention and attrition. These questions are increasingly important to academic and fiscal planning and evaluation. Any study which involves the tracking of individuals over a period of time tends to be time-consuming and complex. Because of the desirability of designing a study that would yield significant information and still be capable of execution in a reasonable period of time, the questions formulated for purposes of this study have been restricted to those which could be answered by an examination of permanent records and transcripts. Within these restrictions, this study was designed to answer some fundamental questions of the groups examined, e.g., how many received awards and how many did not? Of those that received an award, when was the award received in terms of typical two-year or four-year expectations? Of those that did not receive an award, how many were still enrolled? In the case of associate degree programs, how many of those who received an award or did not receive an award and were no longer attending, transferred to another college? More detailed information on the design and assumptions of the study are found in the section titled "Methodology".

The data presented in this report were collected as of the fall 1991 semester and include the following groups of students:

(a) six cohorts of full-time, first-time students in baccalaureate degree programs (fall 1985 - fall 1990), including racial/ethnic detail for the 1985 cohort;
(b) six cohorts of full-time, transfer students in baccalaureate degree programs (fall 1985 - fall 1990), including racial/ethnic detail for the 1985 cohort;
(c) one cohort of full-time, first-time postsecondary opportunity students by race and ethnicity enrolled in a baccalaureate degree program (fall 1985);
(d) three cohorts of full-time, first-time students in associate degree programs (fall 1987 - fall 1989), including racial/ethnic detail for the 1987 cohort;
(e) three cohorts of full-time, transfer students in associate degree programs (fall 1987 - fall 1989);
(f) one cohort of full-time, first-time postsecondary opportunity students by race and ethnicity enrolled in an associate degree program (fall 1987).

By incorporating several cohorts, attrition and retention rates may be examined without having to wait a full five or six years for baccalaureate cohorts or a full three or four years for associate cohorts. Racial/ethnic detail are provided for the following groups of students: White, Non-Hispanic; Black, Non-Hispanic; Hispanic; Asian and Pacific Islander; Native American and Alaskan Native and Non-Resident Aliens.

## FORMAT OF THE ATTRITION AND RETENTION REPORT

This report is organized into four parts. **Part One** provides attrition, retention and graduation information for the following students enrolled in a SUNY Baccalaureate Degree Program:

Full-time, first-time students entering in fall 1985 through fall 1990;
Full-time, first-time students entering in fall 1985 by race and ethnicity;
Full-time, first-time opportunity students entering in fall 1985 by race/ethnicity;
Full-time, transfer students in entering in fall 1985 through fall 1990 and
Full-time, upper and lower division transfers entering in fall 1985 by race/ethnicity.

**Part Two** contains similar information for students enrolled in a SUNY Associate Degree Program. **Part Three** includes baccalaureate trend data for the State University of New York institutions as of the fall 1991 semester for full-time, first-time students, classes of fall 1977 through fall 1990. **Part Four** provides associate trend information for full-time, first-time students, classes of fall 1977 through fall 1991. All tables include headcount and percentage data from a SUNY system perspective, by institutional type and by campus.

## ACKNOWLEDGEMENTS

The accumulation of information contained in this study involved a great deal of work on the part of individual campuses and of SUNY central staff. As the survey technology changes, extra efforts are needed today to produce more consistent data and in some sense "better" data with less labor tomorrow. We appreciate these extra short-term efforts that many of the SUNY campuses provided. We would also like to mention Mr. Gary Blose and Mr. Craig Billie for their expertise and assistance in attrition survey automation. We would like to thank Ms. Sue Hess and her staff for their programming support in automating the attrition survey. Mr. Roy Spoor and Ms. Susan Wendover are recognized for their assistance in attrition table development. Finally, we would like to thank Mrs. Claudia Fleming for her efforts in preparing this publication for printing.

Tommy Annas, Assistant Provost
for Institutional Research

Catherine Regan, Associate
for Institutional Research

# METHODOLOGY

The problem of "measuring" student attrition and retention in an instructional program is complicated by a number of factors some technical and some conceptual. Among the latter is the fundamental problem of defining the concept of attrition in an operationally significant manner. Regardless of its original meaning, the term 'attrition' as it is used within the context of higher education involves the concept of failure to achieve some goal or objective. It would, consequently, be improper to include within attrition figures a student who entered an undergraduate college and completed only one year of study if that student had no commitment to a program of study leading to a formal degree, or no commitment to a specific goal which was not achieved.

The **basic approach** utilized in this study was a **cohort survival analysis**, i.e., to identify, each fall, a group of full-time students enrolled in a degree program and to arrive at attrition/retention information by tracking the same cohort through the institution over time. The reason for selecting a cohort of full-time students enrolled in a degree program was that they, by virtue of their enrollment, expressed a commitment to definable objectives. Specifically, they were committed to (i) full-time study and (ii) attaining a degree. This study is organized so as to provide information regarding the relative success of the cohort in achieving their goals.

The study examines: (i) those students enrolled in baccalaureate degree programs, and (ii) those students enrolled in associate degree programs. If comparisons are made between the two cohorts, a word of caution is advisable. It should be remembered that a student who enrolls in a baccalaureate degree program and leaves the institution after two years without a degree, will be counted as failing to achieve his/her objectives. Whereas, a student enrolled in an associate degree program who receives a degree will have met his/her objectives. Yet, both students may have completed essentially the same course work and performed at essentially the same level of competence. Generally, a four-year institution does not give a formal degree for completing two years of study while a two-year institution does, thus, comparisons between the two cohorts with respect to ability and achievement should be made with caution.

Attrition/retention data in baccalaureate degree programs are based on full-time, first-time and full-time, transfer students who entered in fall 1985, fall 1985, fall 1987, fall 1987, fall 1989 and fall 1990. In addition, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in baccalaureate Programs who entered in fall 1985. Each cohort was divided into those who received a degree, thereby achieving their baccalaureate educational objectives, and those who did not receive a degree. Of those who did not receive a degree, the number still persisting/still enrolled in the institution, either part-time or full-time, were reported. Degree recipients were also reported in terms of the conventional four-year time frame, i.e. those graduating in less than four years, those graduating within four years after admission and those graduating later, during the fifth and sixth years. All data were collected as of the fall 1990 semester, therefore, many students in the most recent cohorts will be reported as persisters still enrolled.

It would be incorrect to infer that students who are no longer enrolled have abandoned their educational objectives. They may or may not have abandoned their original goals. All that is known for certain regarding the students who are no longer enrolled is that, for reasons which we do not have, their relationship with the institution has ceased. Again, a cautionary note, the reasons for leaving the institution may be many and varied, e.g., financial, academic, abandonment of original objectives, illness, desire to attend another institution, or any variety of personal and non-personal reasons. Consequently, inferences made from the data regarding students no longer enrolled should be made with caution.

Attrition/retention data in associate degree programs are based on full-time, first-time and full-time, transfer students who entered in fall 1987, fall 1988 and fall 1989. Additionally, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in associate Programs who entered in fall 1987. The divisions of each cohort are similar but not identical to the divisions utilized for baccalaureate degree students. Consequently, the same cautionary notes apply. The major difference in the case of the associate degree programs is that additional information is provided regarding the number and distribution of students who transferred to another college. This additional information was sought in the case of the associate degree programs since many of these programs are designed to be university parallel programs leading to transfer to another institution.

In interpreting the data for attrition in associate degree programs, it should be noted that those students whose ultimate objective is to receive a baccalaureate degree may, because of limitations on the transferability of credits and other factors, perceive it to be in their best interest not to complete the associate degree program. Consequently, some students may not receive a formal award in a two-year program by prior design. In this instance, therefore, attention should be given to the students who do not receive an associate degree but do transfer to another college.

## ORGANIZATION OF THE ATTRITION/RETENTION TREND DATA

Attrition/retention trend tables summarize the data collected by the attrition/retention surveys for full-time, first-time students enrolled in a SUNY baccalaureate and a SUNY associate degree program. The trend tables allow attrition, degree completion and persistence data to be compared across the fourteen years of survey administration. Trend tables permit historic analyses of attrition and retention information by campus, by type of institution and on a SUNY-wide basis.

Baccalaureate and associate trend tables present data on groups of full-time, first-time students from the classes of fall 1977 through fall 1991. Both descriptive and percentage data for degree and non-degree recipients are presented in a cumulative format. Since the attrition/retention survey format and data collection procedures were modified over the period of survey administration, ***two models have been developed to facilitate the understanding and the interpretation of the trend data. The model for baccalaureate programs immediately follows on page xii and the other one for associate programs can be found on page xiii.*** Each model contains information about the detail reported for the entering cohort, as well as source documentation, reporting years and times.

**DEGREE RECIPIENT DATA** - At the baccalaureate level, the column labeled "WITHIN FOUR YEARS" includes degree data reported up to and during the summer of the fourth year of school or before the fall of the fifth year. The columns reporting the remaining degree data are followed by the word "PLUS" to underscore the fact that summer degree recipients are included in the data. The column labeled "FIVE YEARS PLUS" includes degrees earned during the fifth year of school plus the summer of the fifth year. The column labeled "SIX YEARS PLUS" includes degree data reported for the sixth year of school plus the summer of the sixth year after enrollment.

At the associate level, the column labeled "WITHIN TWO YEARS" includes degree recipients reported up to and including the summer of the second year of school or before the fall of the third year. The columns reporting the remaining degree data are followed by the word "PLUS" to underscore the fact that summer degree recipients are included in the data. The column labeled "THREE YEARS PLUS" includes degree data reported for the third year of school plus the summer of the third year. The column labeled "FOUR YEARS PLUS" includes degree data reported for the fourth year of school plus the summer of the fourth year after enrollment. Degree data reported in the same column are comparable across all of the included years.

**NON DEGREE RECIPIENT DATA** - Persisters and those who left an institution without a degree are reported as of the fall semester. Persisters in this study include those who are still enrolled and have not earned a degree. Continuous enrollment is not a condition for persistence, thus, students who are no longer "stop-outs" are included in the persistence data. Those who left an institution without a degree may return, or transfer to another institution or enter the workforce. Attrition and retention comparisons of data within the same column are possible.

## SUMMARY OF DATA

This is the ninth Attrition and Retention publication of the Central Office of Institutional Research (see Appendix for Publications List). It reports the results of the 1991 Attrition/Retention Survey of the State University of New York. This publication also includes attrition and retention **trend** data for full-time, first-time baccalaureate and associate students, as well as racial/ethnic detail for full-time, first-time students, including opportunity students, entering a baccalaureate program in fall 1985 or an associate program in fall 1987.

## PART ONE - ATTRITION AND RETENTION DATA SUMMARY FOR SUNY BACCALAUREATE STUDENTS

**Part One** presents **baccalaureate** information on the history of full-time, first-time and full-time, transfer students entering in fall 1985 through fall 1990. In addition, racial/ethnic detail are provided for first-time and transfer students entering in the fall 1985 semester and for postsecondary opportunity students enrolling for the first-time in fall 1985. Both headcount and percentage data are presented from a SUNY-wide perspective, by institutional type and by institution as of the fall 1991 semester.

### BACCALAUREATE GRADUATION RATES FOR FULL-TIME, FIRST-TIME STUDENTS

Table 92/833 indicates that 21,202 full-time, first-time students enrolled in a SUNY Baccalaureate Degree Program in the fall of 1985 (Class of 1989). Six years after admission, 55.69 percent (11,808 students) had earned a degree, 42.64 percent (9,040 students) had left an institution without a degree and 1.67 percent (354 students) were still enrolled. As shown, during the sixth year, 2.37 percent of the students entering in fall 1985 earned a degree, consequently, the five-year SUNY completion rate is 53.32 percent. During the fifth year, 13.92 percent of the full-time, first-time students entering in fall 1985 earned a degree, bringing the four-year graduation level to 39.4 percent. The data demonstrate that over sixteen percent of SUNY full-time, first-time students complete a baccalaureate degree program during the fifth and sixth years after enrollment. Clearly, full-time, first-time students are taking longer to graduate than the traditional four years for earning a baccalaureate degree.

Table 92/833 demonstrates also that SUNY baccalaureate graduation rates vary by institutional type and by institution. In general, the Statutory Colleges have the highest overall 4th, 5th and 6th year completion rates (75.21, 85.14 and 85.81 percents) respectively, followed by the University Centers (42.79, 57.71 and 60.17 percents), and the University Colleges (33.11, 46.71 and 49.16 percents). It must be remembered that these percentages represent average graduation rates by SUNY institutional type and that there are significant differences in the completion rates of SUNY institutions within an institutional type. The graduation rates of full-time first-time students by individual SUNY campuses are available in Table 92/833.

## BACCALAUREATE ATTRITION RATES FOR FULL-TIME, FIRST-TIME STUDENTS

The first, second, third and fourth year attrition rates for SUNY baccalaureate institutions are indicated by the partial cohort data in Table 92/833. The attrition rate of the fall 1990 cohort as of fall 1991 represents SUNY first-year attrition rate of 16.24 percent for full-time, first-time baccalaureate students. The drop-out rate after two years is shown by the attrition rate of the 1989 entering cohort as of fall 1991. An attrition rate of more than eleven percent during the second year increases the two-year attrition rate to 27.55 percent. During the third year after enrolling, another 6.15 percent of the entering cohort drop-out, bringing the cumulative third year attrition rate to 33.70 percent as shown by the fall 1988 entering cohort. By the following fall, an additional 6.63 percent of the cohort leaves an institution without a degree, raising the four-year attrition rate to 40.33 percent. While these figures are indicative of SUNY baccalaureate attrition rates, it should be remembered that these data represent different cohorts at one point in time, rather than one cohort over time.

Since graduation and attrition rates are inversely related, i.e., institutions that report higher completion figures also report lower percentages of attrition. Thus, when SUNY institutions are ranked from low to high on sixth-year attrition by institutional type, we find that the Statutory Colleges (12.85 percent) have the lowest attrition, followed by the University Centers (37.81 percent) and next, the University Colleges (49.33 percent). SUNY institutions within an institutional type vary widely in their attrition and retention rates and should be examined on an individual campus basis.

## BACCALAUREATE GRADUATION BY RACIAL/ETHNIC GROUP, INCLUDING POSTSECONDARY OPPORTUNITY STUDENTS

SUNY full-time, first-time baccalaureate graduation rates also differ by race and ethnicity. The racial/ethnic distribution of attrition and retention data for full-time, first-time students entering in the fall of 1985 are presented in Table 92/829 along with percentage data by racial/ethnic group and by attrition/retention category. The aggregated data for "All Baccalaureate Programs" does not include Empire State College and, therefore, the figures are somewhat less than the aggregated data for the same group of students presented above in Table 92/833. As shown, of the 21,160 students that enrolled in fall 1985, 17,567 (83.02 percent) are White (non-hispanic), 1,376 students (6.50 percent) are Black (non-hispanic), 616 students (2.91 percent) are reported as Hispanic, 761 of the students (3.60 percent) are Asian/Pacific Islander, only 60 students (.28 percent) are identified as American Indians or Alaskan Natives, one percent or 206 students have Non-Resident Aliens status and the racial/ethnic identity of 2.71 percent of the cohort (574 students) is unknown.

As Table 92/829 indicates, the overall completion rate for full-time, first-time students from this cohort is 55.78 percent. White (non-hispanic) and Asian/Pacific Islander students have higher than average graduation rates, 58.42 percent and 58.21 percent, respectively, while the remaining groups have lower graduation rates six years after enrollment. Hispanic students from this cohort graduate at a rate of 39.45 percent, Non-Resident Aliens have a 40.78 percent completion rate, Black (non-hispanic) students earn a degree at a rate of 36.12 percent and 28.33 percent of the American Indians and Alaskan Natives graduate with a baccalaureate degree. These data indicate that SUNY completion rates differ by race and ethnicity for full-time, first-time students enrolled in a baccalaureate degree program. The purpose of this study is to describe the completion patterns of different racial/ethnic groups in response to NYS reporting requirements. It is not an analysis of the reasons or causes for persistence versus attrition in NYS public higher education. The literature suggests many factors that could influence student persistence patterns at four-year institutions that were simply beyond the scope of this study. In particular, research on the role of student involvement in campus life, academic and social integration, student intentions to persist and quality of student, faculty and staff efforts could add to our understanding of persistence. This study, however, does provide a valuable description of persistence in SUNY four-year institutions.

Further characterization of the racial/ethnic distribution and graduation patterns of SUNY baccalaureate students enrolled in a postsecondary opportunity program is presented in Table 92/830. As shown, there were 1,772 full-time, first-time students enrolled in an opportunity program in fall 1985. Six years later, 563 students (31.77%) earned a degree, 1,153 students (65.07%) left an institution without a degree and 56 students (3.16%) were still enrolled. Black (non-hispanic) students comprise nearly 42 percent of the full-time, first-time opportunity cohort, followed by White (non-hispanic) students (31.25 percent), Hispanic students (16.25 percent), Asian and Pacific Islander students (8.92 percent), with the remaining groups contributing less than one percent to the total cohort size.

The racial/ethnic distribution of the completion data from Table 92/830 indicate that Asian/Pacific Islander opportunity students graduate at a rate of 39.24 percent after six years, the percentage of Hispanic opportunity students who complete a degree is 30.56%, while 33.21% of the White (non-hispanic) opportunity students earn a degree and 30.70% of the Black (non-hispanic) students from this cohort graduate. The data illustrate that the completion rates are lower for opportunity students than for all full-time, first-time students from the 1985 entering cohort. However, there are greater differences in the completion rates of opportunity students and all students from the White (non-hispanic) group (25.21 percent) and Asian and Pacific-Islander group (19 percent). While Black (non-hispanic) and Hispanic opportunity students graduate at rates that are more closely related to the completion rates of all full-time, first-time Black and Hispanic students, 5.42% and 8.89%, respectively.

These percentages reflect the average of all SUNY baccalaureate degree programs and conceal the range of completion rates by race and ethnicity for individual SUNY campuses. If such information is desired, then further examination of the graduation rates by race and ethnicity presented in Tables 92/829 and 92/830 is recommended.

## GRADUATION DATA FOR SUNY BACCALAUREATE TRANSFER STUDENTS

As shown in Table 92/835, the degree completion rate of full-time, transfer baccalaureate students from the fall 1985 entering cohort is 65.05 percent as of fall 1991. As expected, baccalaureate students transferring at the upper division level have the higher degree completion rate, 71.89 percent, while lower division transfers have a 57.95 percent degree completion rate six years after enrollment. Further examination of the cohort entering in fall 1985 indicates that most upper division students graduate within two and three years after enrollment. As displayed, 46.43 percent of the entering cohort earn a degree within two years and an additional 19.93 percent graduate during the third year. This means that sixty-four percent of the upper division graduates earn a degree within two years and approximately ninety-two percent complete a degree program three years after entering a SUNY institution.

At the lower division, transfers are more likely to earn a degree three and four years after enrollment. As shown by the cohort entering in fall 1985, 53.15 percent of the entering cohort earn a degree within four years and 38.86 percent graduate within three years. This means that approximately sixty-seven percent of the graduates from the lower division earn a degree within three years and over ninety percent earn a degree within four years after admission. These percentages represent the average graduation rates for full-time, transfer students in a SUNY Baccalaureate Program. Transfer graduation rates differ at individual SUNY campuses as further examination of Table 92/835 will reveal.

## BACCALAUREATE TRANSFER GRADUATION DATA BY RACIAL/ETHNIC GROUP

Table 92/852 presents the baccalaureate transfer data by race and ethnicity, separately for upper and lower division transfer students enrolling in the State University during the fall 1985 semester. At both levels, White (non-hispanic) comprise the large majority of transfer students, i.e., 86.5 percent of the upper division and 82.28 of the lower division transfers. Black (non-hispanic) students constitute only 4.2 and 4.5 percents of the upper and lower division transfers, while the remaining racial/ethnic groups comprise less than 2.5 percent of the cohort at each transfer level. In general, full-time, transfer students have higher completion rates than full-time, first-time students and this observation is reliable when race and ethnicity are considered. The completion rates for transfer students at both the upper and lower divisions are higher than are the graduation rates for first-time students for all of the racial/ethnic groups included in this study.

As shown, upper division transfers have an overall completion rate of 72.59 percent which is approximately seventeen percent higher than the 55.78 percent rate for first-time students. The graduation rate for lower division transfer students (58.16 percent) is within 2.5 percentage points of the first-time completion rate (55.78 percent) and the racial/ethnic distribution of degrees awarded also is similar, particularly for the racial/ethnic groups that are larger in size. At the lower division level, White (non-hispanic) and Asians/Pacific Islanders have higher than average completion rates and Black (non-hispanic) and Hispanic students have lower than average completion rates, similar to the data patterns reported for the first-time cohort. However, at the upper division, when first-time and transfer graduation rates are compared, Black (non-hispanic) and Hispanic transfers have the largest positive differences in graduation percentages. There is a 26 percent difference between the first-time and upper division transfer completion rates of Black students and a 21.73 percent difference for Hispanic students. Differences in the completion rates for White (non-hispanic) first-time and transfer students is seventeen percent which decreases to nine percent for Asian/Pacific Islanders.

Caution must be used when interpreting these data because of the small numbers of minority students representing Hispanic, Asian and Pacific Islander, American Indian and Alaskan Native and Non-Resident transfer students. In addition, these percentages depict average transfer completion rates for all SUNY Baccalaureate campuses. Inter-institutional and intra-institutional graduation rates vary widely and may be found in the remainder of Table 92/852.

## PART TWO - ATTRITION AND RETENTION DATA SUMMARY FOR SUNY ASSOCIATE STUDENTS

**Part Two** presents attrition and retention information for full-time, first-time and full-time, transfer students in an **associate** degree program entering the State University in fall 1987, fall 1988 and fall 1989 as of fall 1991. Data for postsecondary opportunity students are included in the attrition and retention tables for associate programs and are reported separately for full-time, first-time opportunity students by race and ethnicity for students entering in the fall 1987 semester. In addition, racial/ethnic detail are included for the first-time students enrolling in fall 1987. All tables present both descriptive and percentage data from a SUNY-wide perspective, by institutional type and by institution as of the fall 1991 semester.

## GRADUATION, PERSISTENCE AND ATTRITION RATES FOR FULL-TIME, FIRST-TIME ASSOCIATE STUDENTS

As shown in Table 92/834, there were 36,788 full-time first-time students enrolled in a SUNY associate degree program in the fall of 1987 (Class of 1989). An examination of the graduation data indicates that 13,360 of the students (36.32 percent) earn an associate degree after four years and that 16.18 percent of the original cohort or more than forty-four percent of the degree recipients transfer to another institution. Since the data are reported as of fall 1991, the cohort entering in fall 1988 may be used to estimate the three-year SUNY associate graduation rate and likewise, students entering in fall 1989 indicate the completion rate within two years. As shown, 32.97 percent of the entering cohort earn a degree three years after enrolling and 18.66 percent graduate within two years. Nearly sixteen percent of SUNY full-time, first-time students complete an associate degree program during the third and fourth years after enrolling. The data demonstrate that full-time, first-time students are taking longer than the traditional two years to earn an associate degree.

The extended persistence patterns also reflect that the two-year associate time frame is a phenomenon of the past. As shown, 28.79 percent of the full-time, first-time students are still enrolled after two years, more than ten percent of the entering cohort are still enrolled after three and roughly five percent continue enrollment four years after entry.

The associate attrition rate for the Class of 1989 as of fall 1991 is 58.28 percent and 17.83 percent of the original cohort or nearly thirty-one percent of those who left the University without a degree transfer to another institution. The second and third year attrition rates for SUNY associate students are indicated by the partial cohort data presented in Table 92/834. As shown by the cohort entering in fall 1989, the SUNY attrition rate after two years is 52.63 percent. Approximately four percent of the entering cohort leaves an institution without a degree during the third year after enrollment, increasing the cumulative attrition to 56.70 percent, as indicated by the fall 1988 entering cohort. An additional one percent of the entering cohort drops-out during the fourth year, raising the overall attrition rate to 58.28 after four years.

Caution should be exercised when interpreting the transfer status of students who graduate and who leave an institution without a degree because most institutions provide estimates for these data. It is also important to remember that the data presented above portray different cohorts at one point in time, rather than one cohort over time. In addition, percentages reflect average rates across all SUNY institutions offering an associate degree program. Significant differences remain in the completion and persistence patterns of individual institutions within the SUNY System which are presented also in Table 92/834.

## ASSOCIATE GRADUATION BY RACIAL/ETHNIC GROUP, INCLUDING POSTSECONDARY OPPORTUNITY STUDENTS

The racial/ethnic distribution of attrition and retention data for full-time, first-time students entering a SUNY Associate Degree Program in fall 1987 are presented in Table 92/837, along with percentage data by racial/ethnic group, as well as by attrition and retention categories. The aggregated data for "All Associate Programs" does not include Empire State College and, therefore, the figures are slightly less than the aggregated data for the same group of students presented above in Table 92/834. As shown, of the 36,783 students that enrolled in fall 1987, 31,317 (85.14 percent) are White (non-hispanic), 2,104 students (5.72 percent) are Black (non-hispanic), 941 students (2.56 percent) are reported as Hispanic, 439 of the students (1.19 percent) are Asian/Pacific Islander, less than one percent of the students are identified as American Indians or Alaskan Natives (129 students) and as Non-Resident Aliens (352 students) and the racial/ethnic identity of 4.08 percent of the cohort is unknown.

As shown, 36.32 percent of the students entering in fall 1987 (13,360 students) earn an associate degree within four years. White (non-hispanic) and Asian/Pacific Islander students have higher than average graduation rates, 38.46 percent and 38.95 percent, respectively, while the remaining groups with larger numbers of students, have lower graduation rates four years after enrollment. The completion rate for Hispanic students from this cohort is 24.87 percent and Black (non-hispanic) students graduate at a rate of 18.77 percent. Non-Resident Aliens have a reported completion rate of 38.07 percent and, apparently, 28.68 percent of the American Indians and Alaskan Indians earn an associate degree. Since the number of students is small for the later two groups, caution should be used when interpreting these graduation percentages. These data indicate that SUNY completion rates differ by race and ethnicity for full-time, first-time students enrolled in an associate degree program. The purpose of this study is to describe the completion patterns of different racial/ethnic groups in response to NYS reporting requirements. It is not an analysis of the reasons or causes for persistence versus attrition in NYS public higher education. The literature suggests many other factors that could influence student persistence patterns at two-year institutions that were simply beyond the scope of this study. In particular, research on the role of student educational objectives, academic and social integration, student intentions to persist and quality of student, faculty and staff efforts could add to our understanding of persistence. This study, however, does provide a valuable description of persistence in SUNY institutions offering an associate degree.

Further characterization of the racial/ethnic distribution and graduation patterns of SUNY associate students enrolled in a postsecondary opportunity program is presented in Table 92/838. As shown, there were 1,393 full-time, first-time students enrolled in an opportunity program in fall 1987. White (non-hispanic) students comprise 52.98 percent of the students from this group, followed by Black (non-hispanic) students (27.21 percent), Hispanic students (11.34 percent), Asian and Pacific Islanders (4.67 percent) with the remaining groups contributing less than one percent to the total cohort size.

The overall completion rate of full-time, first-time opportunity students entering in fall 1987 is 22.25 percent after four years. Students reported as White (non-hispanic), and Asian and Pacific Islander earn a higher number of degrees, i.e., 24.93 and 26.15 percents, respectively, while Black (non-hispanic) and Hispanic students earn a lower number of degrees (19.26 and 18.35 percents, respectively). The data illustrate that the completion rates are lower for opportunity students than for all students from this cohort with the exception of Black (non-hispanic) opportunity students. The completion pattern for this group are slightly higher than the graduation rates of all Black (non-hispanic) full-time, first-time associate students from the 1987 entering cohort. A comparison of the completion rates of full-time, first-time opportunity students with full-time, first-time students indicates a negative difference of 13.53 percent in the graduation rates of White (non-hispanic) students, a negative 12.8 percent difference for Asian/Pacific Islander students and a negative 6.52 percent difference for Hispanic students.

These percentages reflect the average of all SUNY associate degree programs and conceal the range of completion patterns by race and ethnicity for individual SUNY institutions. If such information is desired, then further examination of the graduation data presented in Tables 92/837 and 92/838 is recommended.

## GRADUATION DATA FOR SUNY ASSOCIATE TRANSFER STUDENTS

As Table 92/836 indicates, 5,243 full-time, transfer students entered a SUNY Associate Degree Program in fall 1987. Four years after admission, 45.95 percent (2,409 students) from the entering cohort earned a degree and nearly 35 percent of the graduates or 16.12 percent of the original cohort transfer to another institution. The three-year completion rate may be estimated by the number of students graduating from the fall 1988 cohort and the number of degree recipients from the fall 1989 cohort approximates the SUNY two-year associate graduation rate for full-time, transfer students. As shown, the degree completion after three years is 44.01 percent with 33 percent of the degree recipients or 14.58 percent of the entering cohort, transferring to another institution. The two-year graduation rate is 33.17 percent with 32.7 percent of the graduates or 10.85 percent of the original cohort, transferring to another institution. While the majority of associate programs are completed by transfer students within the second year after enrollment, the data show that another almost nine percent of the full-time, transfer students graduate during the third and fourth years after enrollment.

Caution is needed when interpreting these data since several cohorts were examined at one point in time to estimate the completion rates of one cohort at several points in time. A further caveat of the data is that most SUNY institutions provided estimates for the transfer status of graduates reported above and thus, the percentages may underestimate or exaggerate the actual number of students who transfer after graduation. In addition, the transfer graduation rates are averaged across all associate programs within the SUNY system and differ for individual campuses as further examination of Table 92/836 will demonstrate.

## PART THREE - SUMMARY OF BACCALAUREATE GRADUATION TRENDS

**Part Three** includes attrition and retention trend information for full-time, first-time students in a SUNY Baccalaureate Degree Program entering in fall 1973 (Class of 1977) through fall 1987 (Class of 1991). Both descriptive and percentage data are presented in a cumulative format from a SUNY-wide perspective, by institutional type and by institution. For a complete description of the trend table format and column headings see the Organization of Attrition/Retention Trend Data on page xi of this Introduction and for data source documentation see the Diagram of Baccalaureate Trend Data on page xii.

An examination of the history of baccalaureate degrees granted within four years for full-time, first-time students indicates that, in general, the percentage of students who earn a degree within the traditional period has declined. As shown in Table 92/861, the four-year graduation rate for baccalaureate students has decreased by roughly nine percent from 46.23 percent for the class of fall 1977 to 37.97 percent for the class of fall 1990. A review of the remaining degree data indicates that this decline has been offset by an increase in the student completion rates five and six years after admission.

The number of full-time, first-time students graduating after five years has increased from approximately eight percent during the early years to an average of fourteen percent in the most recent years. During the sixth year after enrollment an additional two and one-half percent of the students earn a baccalaureate degree. Thus, the trend data indicate that the increases in the graduation rates during the fifth and six years more than compensate for the decline in the traditional four-year period for earning a baccalaureate degree. In fact, the trend data demonstrate an increase of almost five percent in the overall SUNY baccalaureate graduation rate after six years.

It must be remembered that these graduation rates represent average completion percentages for all full-time, first-time students enrolled in a baccalaureate program within the SUNY system. Graduation rates differ for individual campuses and by institutional types as further examination of Table 92/861 will reveal.

# PART FOUR - SUMMARY OF ASSOCIATE GRADUATION TRENDS

**Part Four** summarizes attrition and retention information for full-time, first-time students enrolled in a SUNY Associate Degree Program entering in fall 1975, (Class of 1977), through fall 1989, (Class of 1991). Both headcount and percentage data are presented in a cumulative format from a SUNY-wide perspective, by type of institution and by institution. For a complete description of the trend table format and column headings see the Organization of Attrition/Retention Trend Data on page xi of this Introduction and for data source documentation see the Diagram of Associate Trend Data on page xiii.

A review of the history of associate degrees granted within two years for full-time, first-time students indicates that the percentage of students who earn a degree within the traditional period has declined. As shown in Table 92/862, there is a decrease of approximately 19 percent in number of associate degrees earned within two years, from 37.70 percent for the Class of 1977 to 18.65 percent for the Class of 1991. An evaluation of the remaining degree data indicates that during the third year after enrollment student completion rates generally have increased, from approximately seven percent in the early years to roughly 12.37 percent for the more recent classes. As shown, another three to four percent of the students earn an associate degree during the fourth year. While there has been growth in the number of associate degrees earned during the third and fourth years of enrollment, in general, the trend data demonstrate a decline in the total number of SUNY Associate Degrees earned by full-time, first-time students from the Classes of 1977 through 1991.

There are many reasons why a student may decide not to complete a degree program that are beyond the scope of this study. The research indicates that the student's educational objectives and intentions to persist along with his/her integration into the academic and social aspects of the institution, combine with pre-college characteristics and employment status to influence persistence patterns at two-year institutions. The purpose of this study, however, has been descriptive, and it provides a valuable perspective on persistence patterns over time in SUNY two-year colleges.

It should be noted that graduation data presented above represents the average completion rate for all full-time, first-time students enrolled in an associate program within the SUNY system. Graduation rates differ for individual SUNY campuses as further examination of Table 92/862 will demonstrate.

*(1) Since the following State University of New York campuses have no first–time students enrolled in Baccalaureate Programs, they are not included in the table: Health Sciences Centers, Environmental Science & Forestry, Optometry, Technology at Utica/Rome and Veterinary Medicine. In addition, Empire State College is not included in the aggregated data, since racial/ethnic data were not available from this campus.*

# FOOTNOTES

## Baccalaureate Transfer Students

a
In 1991, Brooklyn Health Sciences Center modified data that were incorrectly reported for the fall 87 cohort. These data appear here for the first time and are different from data previously reported on this cohort.

b
Since the State College of Optometry does not offer baccalaureate degree programs, they are not included in the Specialized College data.

c
The Institute of Technology at Utica/Rome has no lower division transfer students in baccalaureate programs.

d
Since the College of Veterinary Medicine does not offer baccalaureate degree programs, they are not included in the Statutory College data.

e
Fashion Institute of Technology does not enrol lower division transfer students in baccalaureate programs.

Footnote References:

a

These data include all SUNY full-time, first-time students enrolled in associate degree programs. Since the transfer status information was not available from all institutions, it will not equal the aggregated attrition and completion figures.

b

For most SUNY two-year institutions, transfer status information is estimated and should be used with caution. In particular, those students who left an institution without a degree were not directly surveyed.

---

Footnote Reference:

[a] All SUNY Associate Degree Programs are represented by these data. However, the transfer status of the degree recipients and of those who left an institution does not equal the aggregated attrition and completion figures due to the incomplete collecting and reporting of transfer status information.

## FOOTNOTES

[a] Original constituent institutions of the State University of New York at its establishment in 1948.

[b] Date of establishment as a state college or institution.

[c] Date of incorporation into State University of New York.

[d] As of July 1, 1975, New York City Community College and the other community colleges (not shown here) sponsored by the New York City Board of Higher Education were no longer a part of the State University of New York.

NOTE: Dates preceding date indicated for establishment as a state college or institution refer to institutional antecedents of the present college or university. These my have been private institutions or controlled by a governmental entity other than the state. Intermediate institutional developments such as other college affiliation or date of first baccalaureate program offering have been omitted for the sake of brevity.

*The Health Sciences Centers at Buffalo and Stony Brook are shown separately here from their respective core campuses.
